Education

Delhi Technological University (DTU)

Bachelor of Technology in Mathematics and Computing

New Delhi, India

Aug 2023 – May 2027

Indraprastha International School

CBSE Class XII 95.6%

New Delhi, India

Jun 2010 – May 2023

Experience

Times Internet | AI Engineer Intern

Jun 2026 – Present

- Architected and deployed a **Conversational AI Agent serving 360K+ users** with 30,000 monthly active paying users
- Developed an LLM as evaluator pipeline capable of processing and analyzing **30M+ user conversations**
- Transformed 40,000+ unstructured product feedback entries into actionable insights using clustering algorithms and vector embeddings

Renderperk | Founder & Lead Systems Architect (renderperk.studio)

Oct 2025 – Jun 2026

- Architected and scaled a distributed GPU render farm, reaching post revenue in 4 months and cutting rendering costs by **75%**
- Developed 290+ APIs and 20+ data flows running asynchronously distributed across **11 microservices** and **3 production VM's**
- Orchestrated **20+ parallel** GPU workloads, managing **30GB+ data** distributed globally with sub-5 minute synchronization
- Deployed OpenTelemetry for distributed tracing and integrated Fluentd + Grafana for centralized logging and monitoring
- Built CI/CD pipelines for autonomous server deployments and cross-platform desktop application release builds

Nathdwara Advisors LLP | Software Developer Intern (neocfo.io)

May 2025 – June 2025

- Built and deployed AI-powered LinkedIn agent using Python, Playwright and n8n, reducing lead generation effort by **80%**
- Implemented LangChain-powered AI agent for automated Excel parsing and financial forecasting analysis
- Developed interactive dashboards for metric analysis, optimized for sub-second load times through efficient caching strategies

Skills

Languages: Python, C/C++, JavaScript (ES6+), SQL, Bash

AI / Machine Learning: LLMs, LangChain, Langgraph, ChromaDB Vector Embeddings, Clustering, Prompt Engineering

Technologies: FastAPI, Node.js, React, Redux, Electron, React Native, PostgreSQL, MongoDB, Redis, RabbitMQ, Nginx

DevOps / Cloud: Docker, Linux, Git, GitHub Actions, Azure, DigitalOcean, Cloudflare, OpenTelemetry, Grafana, Fluentd

Projects

OverlayLabs: AI-Powered Overlay Automation Hub

Dec 2025 – Jan 2026

- It's a screenshot-first CRM platform enabling seamless customer management across desktop and mobile devices
- Developed a cross-platform, multi-screen desktop application with a system-wide AI overlay bypassing screenshots, but visible to user
- Implemented a Redux synchronization mechanism for real-time state sharing across multiple screens for consistent state management

Agent Bed | [Demo](#)

May 2025 – June 2025

- Built an AI Agent Marketplace with a local-first execution runtime, enabling agents to run entirely on-device without cloud dependencies.
- Prototyped an off-screen rendering pipeline for desktop automation, enabling background UI interaction without disrupting user's activity
- Developed a WSL-powered desktop application provisions Docker-based agentic environments for one-click local deployment and execution

Autonomous Formula Student Racing Car (Team Defiance Racing)

Aug 2023 – Jan 2024

- Developed software for an autonomous Formula Student racing car, implementing path planning and vehicle control algorithms
- Built vehicle models using URDF and implemented inter-node communication across ROS2 nodes for simulation and real-time control
- Contributed to the autonomous racing stack for Formula Student competitions

Neuralperk: Peer-to-Peer GPU Cloud | [Demo](#)

Jan 2024 – Feb 2025

- Developed peer-to-peer platform for GPU workloads, reducing compute costs by **50%** vs. Google Colab
- Enabled one-click workstation hosting on Windows, converting local machines into cloud-ready nodes
- Built client-side Python library for workload submission & management | [PyPI](#)

Awards & Recognitions

International Rank 3: International Olympiad of Mathematics (IOM), Indraprastha International School

National Hackathon Finalist: DTU, BITS Pilani Rank 2

\$500 Innovation Grant: DTU Incubation Centre for decentralized architecture validation
